Exercise 1

- Connect to the Lecroy scope and retrieve its serial number (< 5 lines of code)

```python
from vxi11 import Instrument
instr = Instrument('localhost')
print instr.ask('*IDN?')
```

Exercise 2

- Fetch a waveform from the scope (< 5 lines of code)

```python
from vxi11 import Instrument
instr = Instrument('localhost')
out = instr.ask_raw('C1:WF?')
```
